

LimeWall™ delivers network security for your entire organization.

Imagine a network security solution for your business that was easy to deploy and support without all the headaches associated with special configurations, software upgrades, annual licenses and overall time and energy in learning the nuances of how to best support and secure your business applications.

LimeWall is an advanced security and networking solution that is delivered as a service to corporate offices within the small to medium business market and remote offices within the enterprise. LimeWall provides all the benefits of a corporate firewall without the headache. LimeWall is deployed, configured, and supported 24x7x365 without the need for costly annual contracts for maintenance, software upgrades, and support. Simply identify the locations that require secure connectivity and we will deploy LimeWall Managed Security to meet your specific requirements – all for an affordable monthly subscription.

Firewall Log

Key Benefits

- Firewall
- Stateful Packet Inspection
- Static/Dynamic Routing
- Traffic Shaping
- NAT/PAT
- 1:1 NAT
- CARP (failover)
- Load Balancing
- WAN Failover
- Multiple VPN Support
 - IPsec
 - OpenVPN
 - PPTP
- DHCP Server
- DHCP Relay
- DNS Forwarder
- NTP Server
- Wake on LAN
- Network Diagnostics
- Remote Syslog Support
